

CyberTrust Refund Announcement

Dear CyberTrust Supporters & Pre-ICO Participants:

As you are aware, CyberTrust is in the process of launching Global Crypto Notes permitting the securitization of the major cryptocurrencies such as Bitcoin, Bitcoin Cash and Ethereum.

Processing these notes requires the cooperation of multiple entities, some of which, as it turns out, feel that tokens emitted online in an ICO-type format are an obstacle to the securitisation process.

In this light, we have decided that the best approach is a refund of the tokens bid for during the pre-ICO round in combination with a preferential securitisation price on the securitisation platform. We feel that this approach is the best one both for the project and for our token holders. Since all of the currencies used to acquire CABS tokens have risen substantially in value over the past three weeks, this solution gives our supporters an immediate and substantial return on their investment.

Here is how we intend to proceed:

- 1) Current Pre-ICO CABS holders will be credited with the original amounts they bid for in the currencies which they used.
- 2) For each Pre-ICO CABS token, holders will be credited with a preferential price quota in the same quantity. Holders will be able to use this quota later on to obtain preferential pricing for the securitised coins. There is no fee for these quotas.

This refund process will be carried out automatically on or before December 28, 2017.

After the refunds have been processed, users can withdraw their funds normally.

Thank you for your continued support for the project.
